

Kutala Colliery Mock Mine

Vali V20's are also perfect for training purposes because of the even quicker discharge

TCT, who is a South African distributor of a great assortment of security solutions, have partnered up with some contracting companies, that deal with the mining sector. They required machines for training purposes. Naturally we offered them the Trainer machines, but they wanted an even quicker discharge, to what the trainer machine could offer.

After showing them the Vali V20 they were set on the fact, that the V20 was the machine they wanted. Although we do not use these machines for training, we decided to use them and see what the outcome would be.

Some of the clients have 'Mock Mines', where they do their training, and they installed from 2 to 3 Vali V20's.

They were blown away by the performance of the V20, and the speed at which the discharge filled the area. This was the perfect outcome and result they were looking for, and we now supply V20's to their clients for training purposes. This has created a great demand for fluid, and the clients are happy to realize, that supply of fluid is quick and effective.

There are more and more mines, which are interested in SmokeCloak, and when they see the training facilities of the existing clients, they too want SmokeCloak for their applications as well.

SmokeCloaks mission is to reduce risk and loss for our customers!

With operation in more than 50 countries throughout the world and more than 20 years of experience we are the market leader within fog solutions.

Whether it is about reducing losses in the initial minutes of a break-in or reducing personal risk at fire training sessions our fog solutions provide instant safety.

Our fog and smoke machines are developed with state-of-the-art superior technology.
