

IPL 3000 / IPA 125

SPECIFICATION SHEET

Light and sound protection – as well as fog

These two powerful products from MSS Professional add an extra dimension to instant protection from your SmokeCloak® system. The IPL 3000 is a high-power strobe light that gives a blinding effect when used with dense fog coverage. The IPA 125 is an extremely powerful siren with eight transducers and a built-in back-up battery. When used together with fog, these two products offer total instant protection. Both products are easy to install and will fit into any current alarm installation.

SmokeCloak®

IPL 3000

Installation

The customised mounting assembly makes it possible to mount the unit on walls, in corners, on ceilings or around the edges of buildings etc. The special interface PCB makes the IPL 3000 quick and easy to install.

Design & construction

The IPL 3000 is designed to provide instant protection combined with a reduced SmokeCloak® fog density, to produce a blinding effect.

The IPL 3000 is a high quality, very high intensity, security strobe light. The system is compatible with all of the SmokeCloak® products, and is configured so that the operation of the IPL 3000 is controlled by the SmokeCloak®.

The IPL 3000 is designed for easy installation. The outer casing is made of metal so it can be located in public areas or concealed in roof spaces if preferred. The IPL 3000 can be easily connected to other IPL 3000 units in order to protect larger areas and used in combination with SmokeCloak® vapour, the IPL 3000 gives very effective instant protection at a lower fog density.

Quality assurance

The IPL 3000 is designed, manufactured and sold in accordance with MSS Professional's rigorous quality system.

IPA 125

Installation

The customised holder makes it possible to mount the unit on walls, in corners, on ceilings or around the edges of rooms etc. IPA 125 is easy to install and can complement or replace existing sirens or sounders.

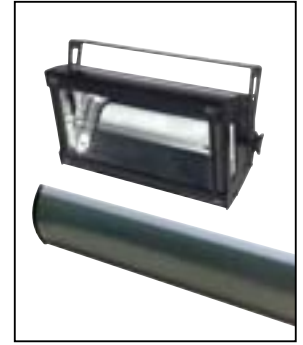

Design & construction

The patented sound of the IPA 125 is produced by 8 extremely powerful transducers driven by a custom built amplifier. This makes the IPA 125 capable of producing 125 db of intolerable sound at a distance of 1 metre. The built-in alarm interface makes it easy to connect to any electronic alarm installation and with on board battery back up, reliable protection is secured.

The IPA 125 is designed to easily fit into all types of buildings. The outer casing is made of aluminium, and incorporates sabotage protection. The IPA 125 can be easily linked with other IPA 125 units in order to protect larger areas; the SmokeCloak® products can be used to control the IPA 125.

Quality assurance

The IPA 125 is designed, manufactured and sold in accordance with MSS Professional's rigorous quality system.

IPL 3000

Product features

- heavy duty sabotage resistant casing
- the optimum solution for larger premises like warehouses
- very high intensity strobe light
- long life xenon lamp
- advanced alarm interface

Installation

- fits in everywhere
- can be installed in any orientation
- complete with mounting bracket

Inputs

- controllable by any Instant Protection SmokeCloak device

Expansion

- multiple units can be linked together

IPA 125

Product features

- internal self-contained power source
- heavy duty sabotage resistant casing
- does not harm people in the activation area
- battery back-up

Installation

- small, for versatile installation
- can replace old sirens
- connects to any electronic alarm system

Inputs

- comprehensive interface, that can be directly linked to a SmokeCloak

Expansion

- multiple units can be linked together

	IPL 3000
Dimensions	425 x 245 x 240 mm
Weight	7.5 kg
Colour	Black
Electrical	210V - 240V - nominal
Lamp	3000 W
Backstop timer	Adjustable 1-25 min in two ranges

	IPA 125
Dimensions	668 x 106 x 40 mm
Weight	1.7 kg
Colour	Aluminium
Battery standby without charger	Min. 1 month
Frequency range	2-4000 Hz
Acoustic effect	1w./1m., 125 dB
Function time at cont. signal	Min. 20 min.
